Body:  
What's on your mind..

Title:

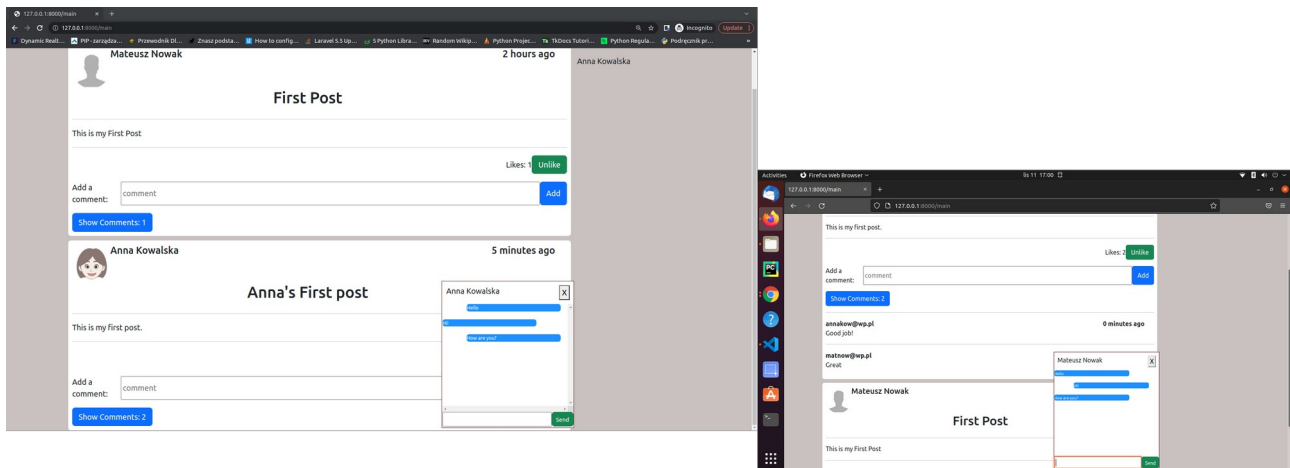

Publicate

Allows you conducting a conversation.

You can chat only with a person belonging to your contacts and currently logged in. In this case you need to click on a person name to open a conversation window. The list with available contacts is visible on a right side of a main view.

You can only chat with contacts on main view page.

## Technologies Used

- Python 3.8.8
- Django 4.1
- MySQL
- CSS 3
- HTML 5
- Bootstrap 4

## Project status

in\_production\_

- Adding the ability to delete and edit posts by the author.
- Sharing posts.

## Room for improvement

- Currently, the conversation management system uses ajax to communicate with the database. This is a pre-production solution that should be built using websockets - django channels to improve system performance.
- Increasing user-friendly application solutions based on front end restructuring
- Scalability of profile images
