Python 3.8, Tkinter, Selenium

General info
Job Finder is desktop web scrapping app, that gives you a possibility of downloading job offers of any occupation you are interested in. You can specify level of experience and territorial coverage. Further you can choose a specific offer and by clicking on it, download only requirements, which will be visible in left bottom side of an app. It's also possible to save a particular job offer, by clicking "zapisz" button.

Request are sending to https://www.pracuj.pl. DOM is later parsed and drop on tkinter window with a layout structure, you can see on picture below.
